SELECTED PROJECTS

- Hiring dashboard prototype - designed recruiter review cards, applicant filters, and status movement states for a student hiring product.
- Security notes playbook - summarized common form, auth, and access-control issues using OWASP beginner references.

EXPERIENCE

- UX Research Volunteer, Campus Product Club - ran short usability sessions and converted feedback into screen improvements.
- Design Sprint Participant - created responsive SaaS flows for onboarding, applicant search, and dashboard review.

EDUCATION

BA Digital Product Design, Berlin University of Applied Sciences - Expected 2027

Target roles: Product Design Intern, UX Research Intern, Cybersecurity Analyst Trainee
